

FREQUENTLY ASKED QUESTIONS

Can Lewis's Re-line my Existing Curtains?

FOR MORE FAQ
www.lewiss.co.nz/faq

Lewis's recommend Maxline linings, which resist mildew and can be spot cleaned. Unfortunately, older curtains are often made with cotton linings which can quickly discolour and are very susceptible to mildew. They also cannot be spot cleaned or dry cleaned. Instead of replacing the whole curtain, there is the option of replacing just the lining. Below are your three options for re-lining your curtains:

> Kapiti Curtain Cleaners

Kapiti Curtain Cleaners are our recommended curtain drycleaners and they also offer a re-lining service. They cover both the Kapiti and Wellington region and offer a pick-up & drop off service, at a reasonable charge. For a one-stop option for cleaning and re-lining, phone 0508 3792 5326.

> Lewis's Measure and Install Service

One of our installers will visit your home to measure the size of the new linings required. Once the linings have been made, the installer will return to remove the old lining and hang a new detachable lining.

> Bring your Curtains to our Showroom

You can remove the old linings from your curtains yourself, and bring them into our showroom. We will then make and attach new detachable linings. Strict Health and Safety standards do require the curtains to be laundered before you bring them in.

Re-lining curtains does involve a lot of work which can be costly, so we only recommend investing in new linings if your curtains are in very good condition. If you have enjoyed your curtains for a number of years already, it may be time to treat yourself to a whole new set of curtains instead.

Please note, Lewis's cannot replace the linings on Roman Blinds.
